AFFIRMATIVE.

LET'S COMPETE
AGAIN TO SEE
WHO CAN
DESTROY MORE!

SHIRURU!

I DON'T REMEMBER
EVER ACTUALLY
COMPETING AGAINST
YOU, SOLOTTO.

YOU'VE
STILL GOT
A LOT OF
STUDYING
TO DO.

YOU ALMOST
GOT YOURSELF
INTO TROUBLE
BY FLYING
TOO HIGH
LAST TIME,
REMEMBER?

AND DON'T
GET TOO
CARRIED
AWAY.

I'M OFF
FIRST!

OH, FOR
THE LOVE
OF-

441

250

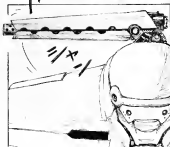

ア
ア
ア

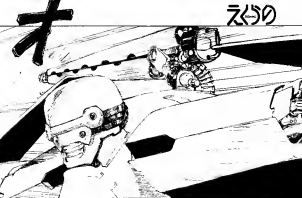

441

441

WHOA-

OH PLEASE,
AS IF MY
B-DICE WOULD
GET DENTED
BY SOMETHING
LIKE THAT!

WELL, I'M
NOT
ORBIT.

THAT LEFT
A DENT,
DIDN'T IT?

WHAT'S THAT?

CHANGE
OF
PLANS.

SOMETHING
ABOUT THE
DROP-OFF
POINT BEING
OFF.

SEEMS THE
ASTEROID TRAIN
RETRIEVAL THIS
TIME IS TAKING A
LOT LONGER
THAN PLANNED.

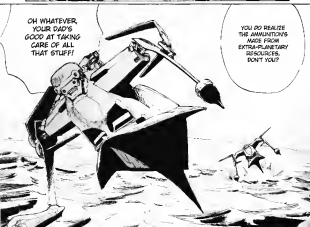

YEAH,
YEAH.

LOOK,
YOU'RE
FIRING
TOO MUCH.

YOU'RE
GONNA RUN
OUT OF
AMMUNITION
AT THIS
RATE!

CUT
THAT! NO
NOBODY!

OH WHATEVER,
YOUR DAD'S
GOOD AT TAKING
CARE OF ALL
THAT STUFF!

YOU DO REALIZE
THE AMMUNITION'S
MADE FROM
EXTRA-PLANETARY
RESOURCES,
DON'T YOU?

ACTUALLY,
NO.

THIS IS
OUR JOB,
AFTER ALL!

COME ON, YOU
SHOULD PUT
MORE OF AN
EFFORT INTO
DESTROYING
THEM TOO!

FOUR!

WHY DO I
EVEN BOTHER
WITH YOU...

WE'RE DOING
OUR
HOMEWORK
AS SOON AS
WE GET BACK.

THIS IS JUST
A LITTLE WAY
TO LET SOME
STEAM OFF.

OUR "JOB"
IS TO
STUDY AS
STUDENTS.

FIVE!

WHAAAT?

**HAHA! THAT
MAKES SIX!**

LISTEN
WHEN
OTHERS
SPEAK TO
YOU FOR
ONCE.

NEXT...!

YOU'RE
GOING TO
ANGER THE
TEACHER
AGAIN IF
YOU DON'T.

**NOW THAT
DESERVES A
COMPLIMENT!**

**MAYBE
AFTER YOU
FINISH
YOUR
HOMEWORK.**

**YOUR ENTIRE
B-RICE OWES
ITS ENTIRE
CREATION TO
MATHEMATICAL
AND SCIENTIFIC
KNOWLEDGE.**

**WELL IT'S
THANKS TO
"BORING"
MATH THAT
YOUR BULLETS
CAN FIND THEIR
MARK RIGHT
NOW.**

**WHO CARES
ABOUT
BORING
STUFF LIKE
ALGEBRA?!**

**MATH
SUCKS!**

UGHH...

SEVEN!

THAT'S
EXACTLY WHY
YOU NEED TO
STUDY MORE.

I'M NOT CUT
OUT FOR
THAT STUFF.

LIKE...
I...
CARE...!

PLEASE,
NO.

I'LL JUST BE
YOUR WIFE
WHEN I
GROW UP!

NOPE!
I DON'T
NEED TO
STUDY
AT ALL!

S-

SEVEN?

NO, NOT
SEVEN!
EIGHT!

I DON'T NEED
A DUMB WIFE
THAT DOESN'T
EVEN KNOW
HER
ALGEBRA.

AH-

OH.

THERE
AREN'T EVEN
ANY LEFT.

THEN LET'S
JUST DO 10
HOMEWORK
QUESTIONS
INSTEAD WHEN
WE GET BACK.

**AGH,
DAMMIT!**

**AND I WAS
SO CLOSE
TO REACHING
10 TOO!**

**NOOOO!
I DON'T
WANNAAA!**

The world
today is
submerged.

It's theorized
that a
mysterious
form of
extraterres-
trial life was
unknowingly
transferred to
Earth,

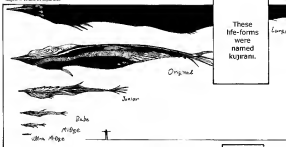

And as they
multiplied,

They
dramatically
changed
Earth's
environ-
ments.

When the
unmanned
plant was
set up in
the asteroid
belt to mine
for more
natural
resources,

It didn't have
to do anything
with the
environmental
problems
people of the
past were
concerned
about.

And they will also attack when approached.

However, they can move and perceive their immediate surroundings like animals.

They're actually closer to plants.

The kuguro aren't animals.

Humanity is currently confined to the surface of the oceans.

They attack with their frontal horns or high-pressure dorsal water spouts.

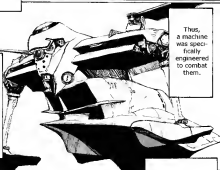

Flying any higher will get you targeted by their high pressure water spout attacks dubbed "Hydro-cutters."

They can only be approached from just above the water, to the point where our machines barely graze the water.

The
"Ekrano
Bi-dice."

Thus, a machine was specifically engineered to combat them.

They protect humanity from any Kujirani that happen to approach.

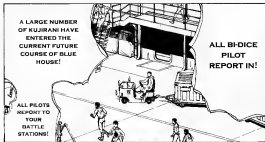

The bi-dice patrol 24/7 around all islands humans currently reside on.

IT'S NOT A
GAME...

LET'S GET
TO WORK
THEN!

COME
ON.

ahh...

LET'S SEE WHO
CAN FIRST GET
UP TO 20 KILLS!

OH
REALLY?

JUST SO YOU KNOW,
THE X AND Y AREN'T
ACTUAL LETTERS
THEY'RE JUST
SYMBOLS TO STAND
IN FOR NUMBERS.

PLEASE
LISTEN TO
PEOPLE
WHEN THEY
TALK TO
YOU.

この宿題だったら、どんどんどいだー

My reference books this time: PEKRAMO PLANS (MIDLANDS)

The sketch I drew for this mecha is based off a jetaid-like robot I doodled almost 16 years ago.

And then I thought maybe I could make it like an Ekranoplane. Even though they look so cool, I couldn't find any Japanese books on Ekranoplanes, so I ended up shelling out to buy an expensive foreign book on Ekranoplanes that I could use as reference material.

But as you might figure, I just ended up looking at the pretty pictures and not really doing anything with them. I couldn't really use it for reference in the end. However,

"A-10 Rescue Team Take-off"

This was a book I read almost 30 years ago when I was in middle school. What especially appealed to my middle-schooler-heart was the top-secret "Jesus Box" device. It was the first piece of fiction that I'm aware of that introduced the concept of a machine being controlled by the pilot's brain waves. The story's about an A-10 controlled by brain waves taking it out against MIG-25. Even reading it now, it still gets my spirit burning.

Ever since, the robots that I've come up with are all more or less mind-controlled. Fiddling with levers and buttons is just such a hassle, you know. But there were hardly any scenes of that in this mecha so this book didn't really help out much as a reference book either.
